Objective

To leverage my successful experience as a hospitality manager and continuously developing skills in software and programming, towards an engaging and rewarding career in technology.

Experience

Freelance Web Developer

Adm.Bjmn

Mar 2023 - Present

Building full stack web applications for local businesses that provide useful tools to help them organise. Built with Django, these include websites and database driven assets like client management tools, inventory systems and web applications. Simple but effective tools that help people to manage their workloads.

Hospitality Consultant

Adam Bastow

Mar 2019 - Present

Working as a freelance consultant I approach hospitality businesses and help implement useful changes to their procedures in order to promote maximum output. Helping clients optimise their workflow by working closely with their teams to streamline procedures and minimise wasted or misused resources. By achieving healthy and sustainable avenues for growth I have been able to satisfy my clients requests and leave business with stable frameworks to build on after my departure.

Restaurant Manager

Etsu Izakaya

Jan 2016 - Mar 2019

Etsu Izakaya is a 230 seat fine dining restaurant with over 30 members of staff and a glistening reputation. At Etsu I worked closely with many local agricultural businesses and produce vendors to create a community atmosphere and a buzz around our contribution to the food scene on the Gold Coast. This helped us stay fondly in the minds of locals and tourists alike and with the help of my leadership Etsu gained recognition as one of Australia's top 100 Japanese Restaurants and continues to this day to lean on many of the procedures and systems I helped implement.

Restaurant Manager

Black Coffee Lyrics

Jan 2011 - Jan 2016

Black coffee Lyrics was a specialty coffee and breakfast outlet from 06:00 to 15:00 and a highly regarded modern Australian restaurant from 17:00 until midnight. I was able to learn hands on in this independent establishment where myself and the two owners got to grips with hospitality on the job in a fast paced and ruthless industry. We had a fantastic career, creating a local atmosphere in one of Australia's fastest tourist destinations and managed to create a space where our guests made lasting memories. We planted our feet firmly at the number one spot on trip adviser in the Gold Coast area for the entirety of our tenure and as a trio we became widely known for our casual yet refined approach to modern cuisine, service and atmosphere. The restaurant was sold on in 2016 at which time the three of us retired from the venue together.

Education

HyperionDev

Bootcamp, Data Science Dec 2022 - Feb 2023

HyperionDev

Bootcamp, Computer Software Engineering Nov 2022 - Dec 2022

Academique - Gold Coast, Australia
